About Us

In the spring of 2004, Rocky Mountain Structures, LLC broke ground for a manufacturing facility located in the heart of our Amish community in the Lykens Valley to build playhouses and storage sheds. During the construction phase on the sunny side of the Mahantongo Mountain we encountered very rocky terrain. Hence the name Rocky Mountain Structures, LLC was born.

As our business continued to grow supplying affordable portable storage structures to central Pennsylvania and the Mid-Atlantic region we started to see a demand for quality built garages and pole buildings. Encouraged by our customers, we developed a line of horse barns and agricultural, commercial and residential structures.

Our professional crews are dedicated to making your building experience simple and stress free from start to finish. Starting with grading the site to constructing the entire building on-site, our goal is to produce top-quality craftsmanship every step of the way.

Thank you for considering Rocky Mountain Structures, LLC. Your dream of having a quality built structure is only a phone call away, so call us today. We would enjoy adding your name to our growing list of satisfied customers.

Ammon K. Stoltzfus
